

Cross Connect (XC)

CONNECTION BETWEEN CUSTOMERS HOSTED IN THE SAME DATA CENTER FACILITY

We connect companies' IT infrastructure to service providers and ecosystem partners located within the same data center through copper or dark fiber connections, delivering secure, high-speed, and dedicated connectivity.

Use Case

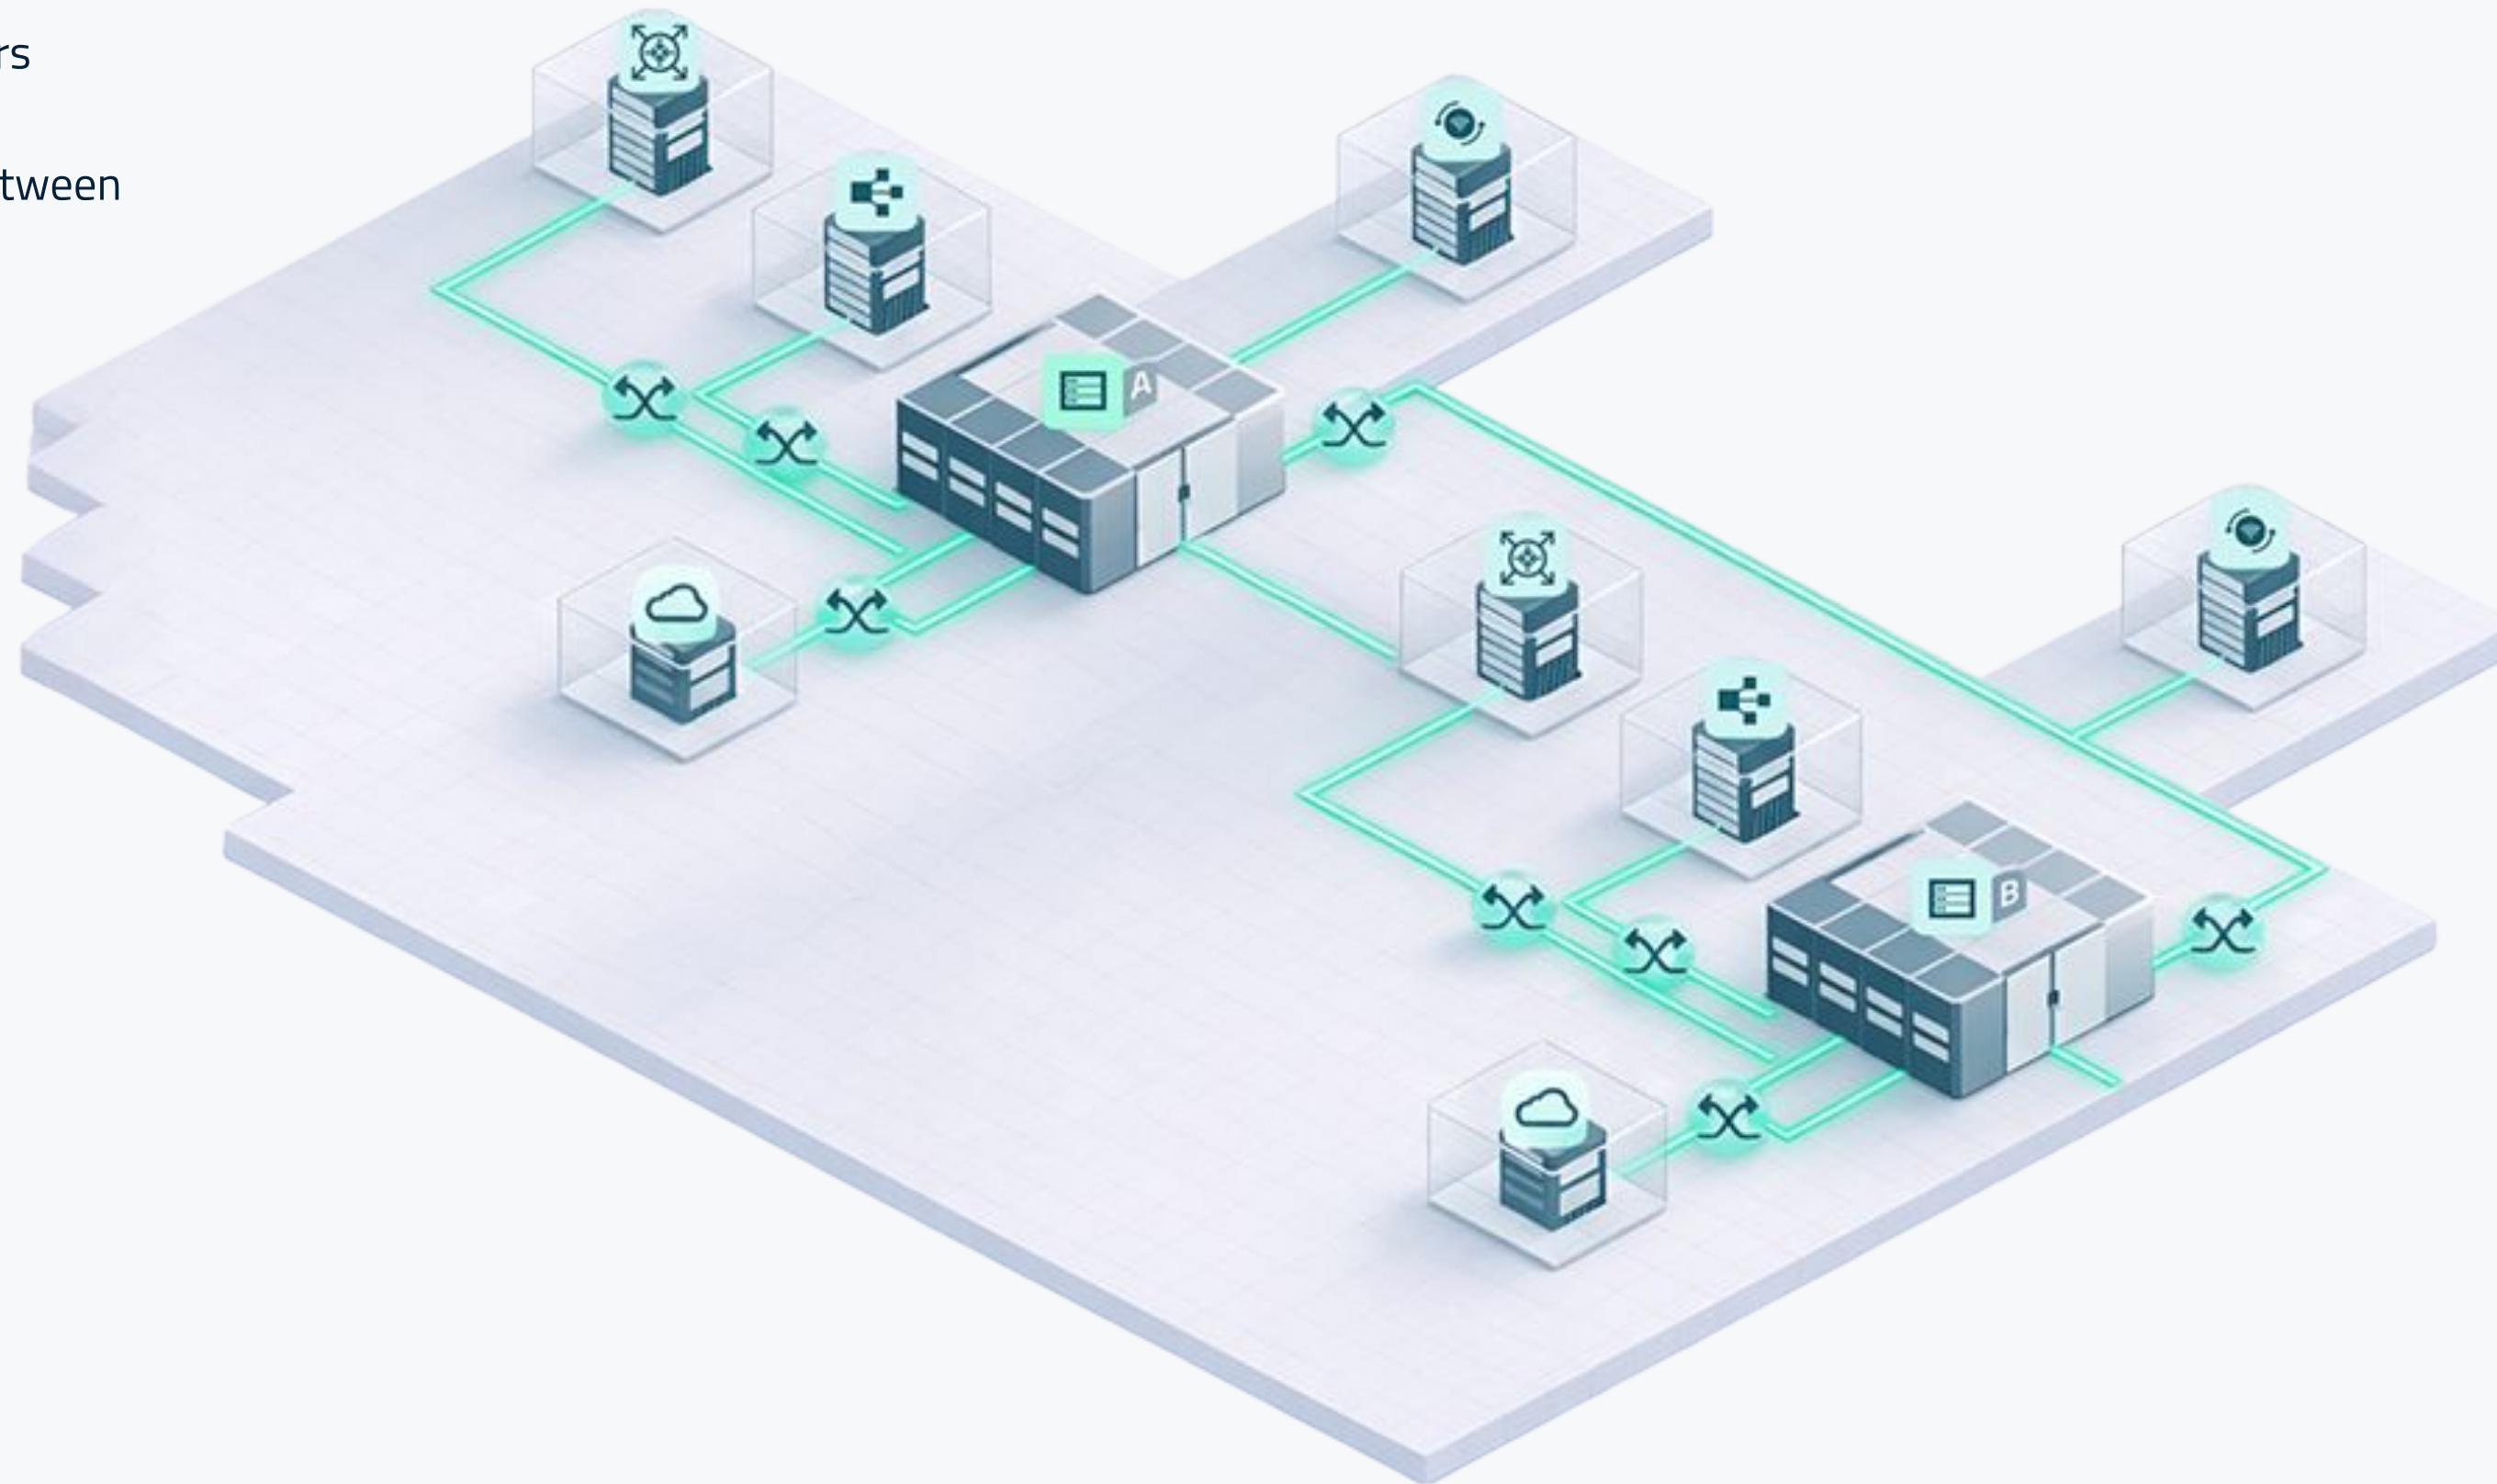

- Data cabling to connect two local customers infrastructure.
- 100% dedicated connectivity without in-between equipment.

Commercial

- **Non-Recurring Charge (NRC):** installation one-time charge.
- **Monthly Recurring Charge (MRC):** Applicable monthly charge for each Cross Connection.

Implementation

- Standard service request: 1-10 Cross connections.
- Implementation SLA: 72 hrs.
- **Special Projects:** A feasibility and delivery time evaluation for special high volume cabling projects or with customized requirements.

Additional Considerations

- A LOA (Letter of Authorization) is needed for a XC service between 2 different customers.
- For a redundant XC service, a request for two different paths and two different CX is required.
- Additional components like ODFs, Patch Panels, Patch Cords or Jumpers, are not included.

Technical Specifications

Type of material

- Copper wiring Unshielded Twisted Pair (UTP), RJ45 connector, 90 mts maximum.
- Multimode/singlemode optic fiber, C standard connector, 250 mts maximum.

Availability

MEX1, MEX2, MEX3, MEX4, MEX5, MEX6, QRO1, PAN1, GTM1, SDO1, BOG1 y MTY1.
