

# Intraconnect

## CONNECTION BETWEEN IT INFRASTRUCTURE OF THE SAME CUSTOMER HOSTED IN A KIO DATA CENTER.

We interconnect your IT infrastructure in order to bring agility to your business processes by offering a copper or fiber optic connection.

### Use Case

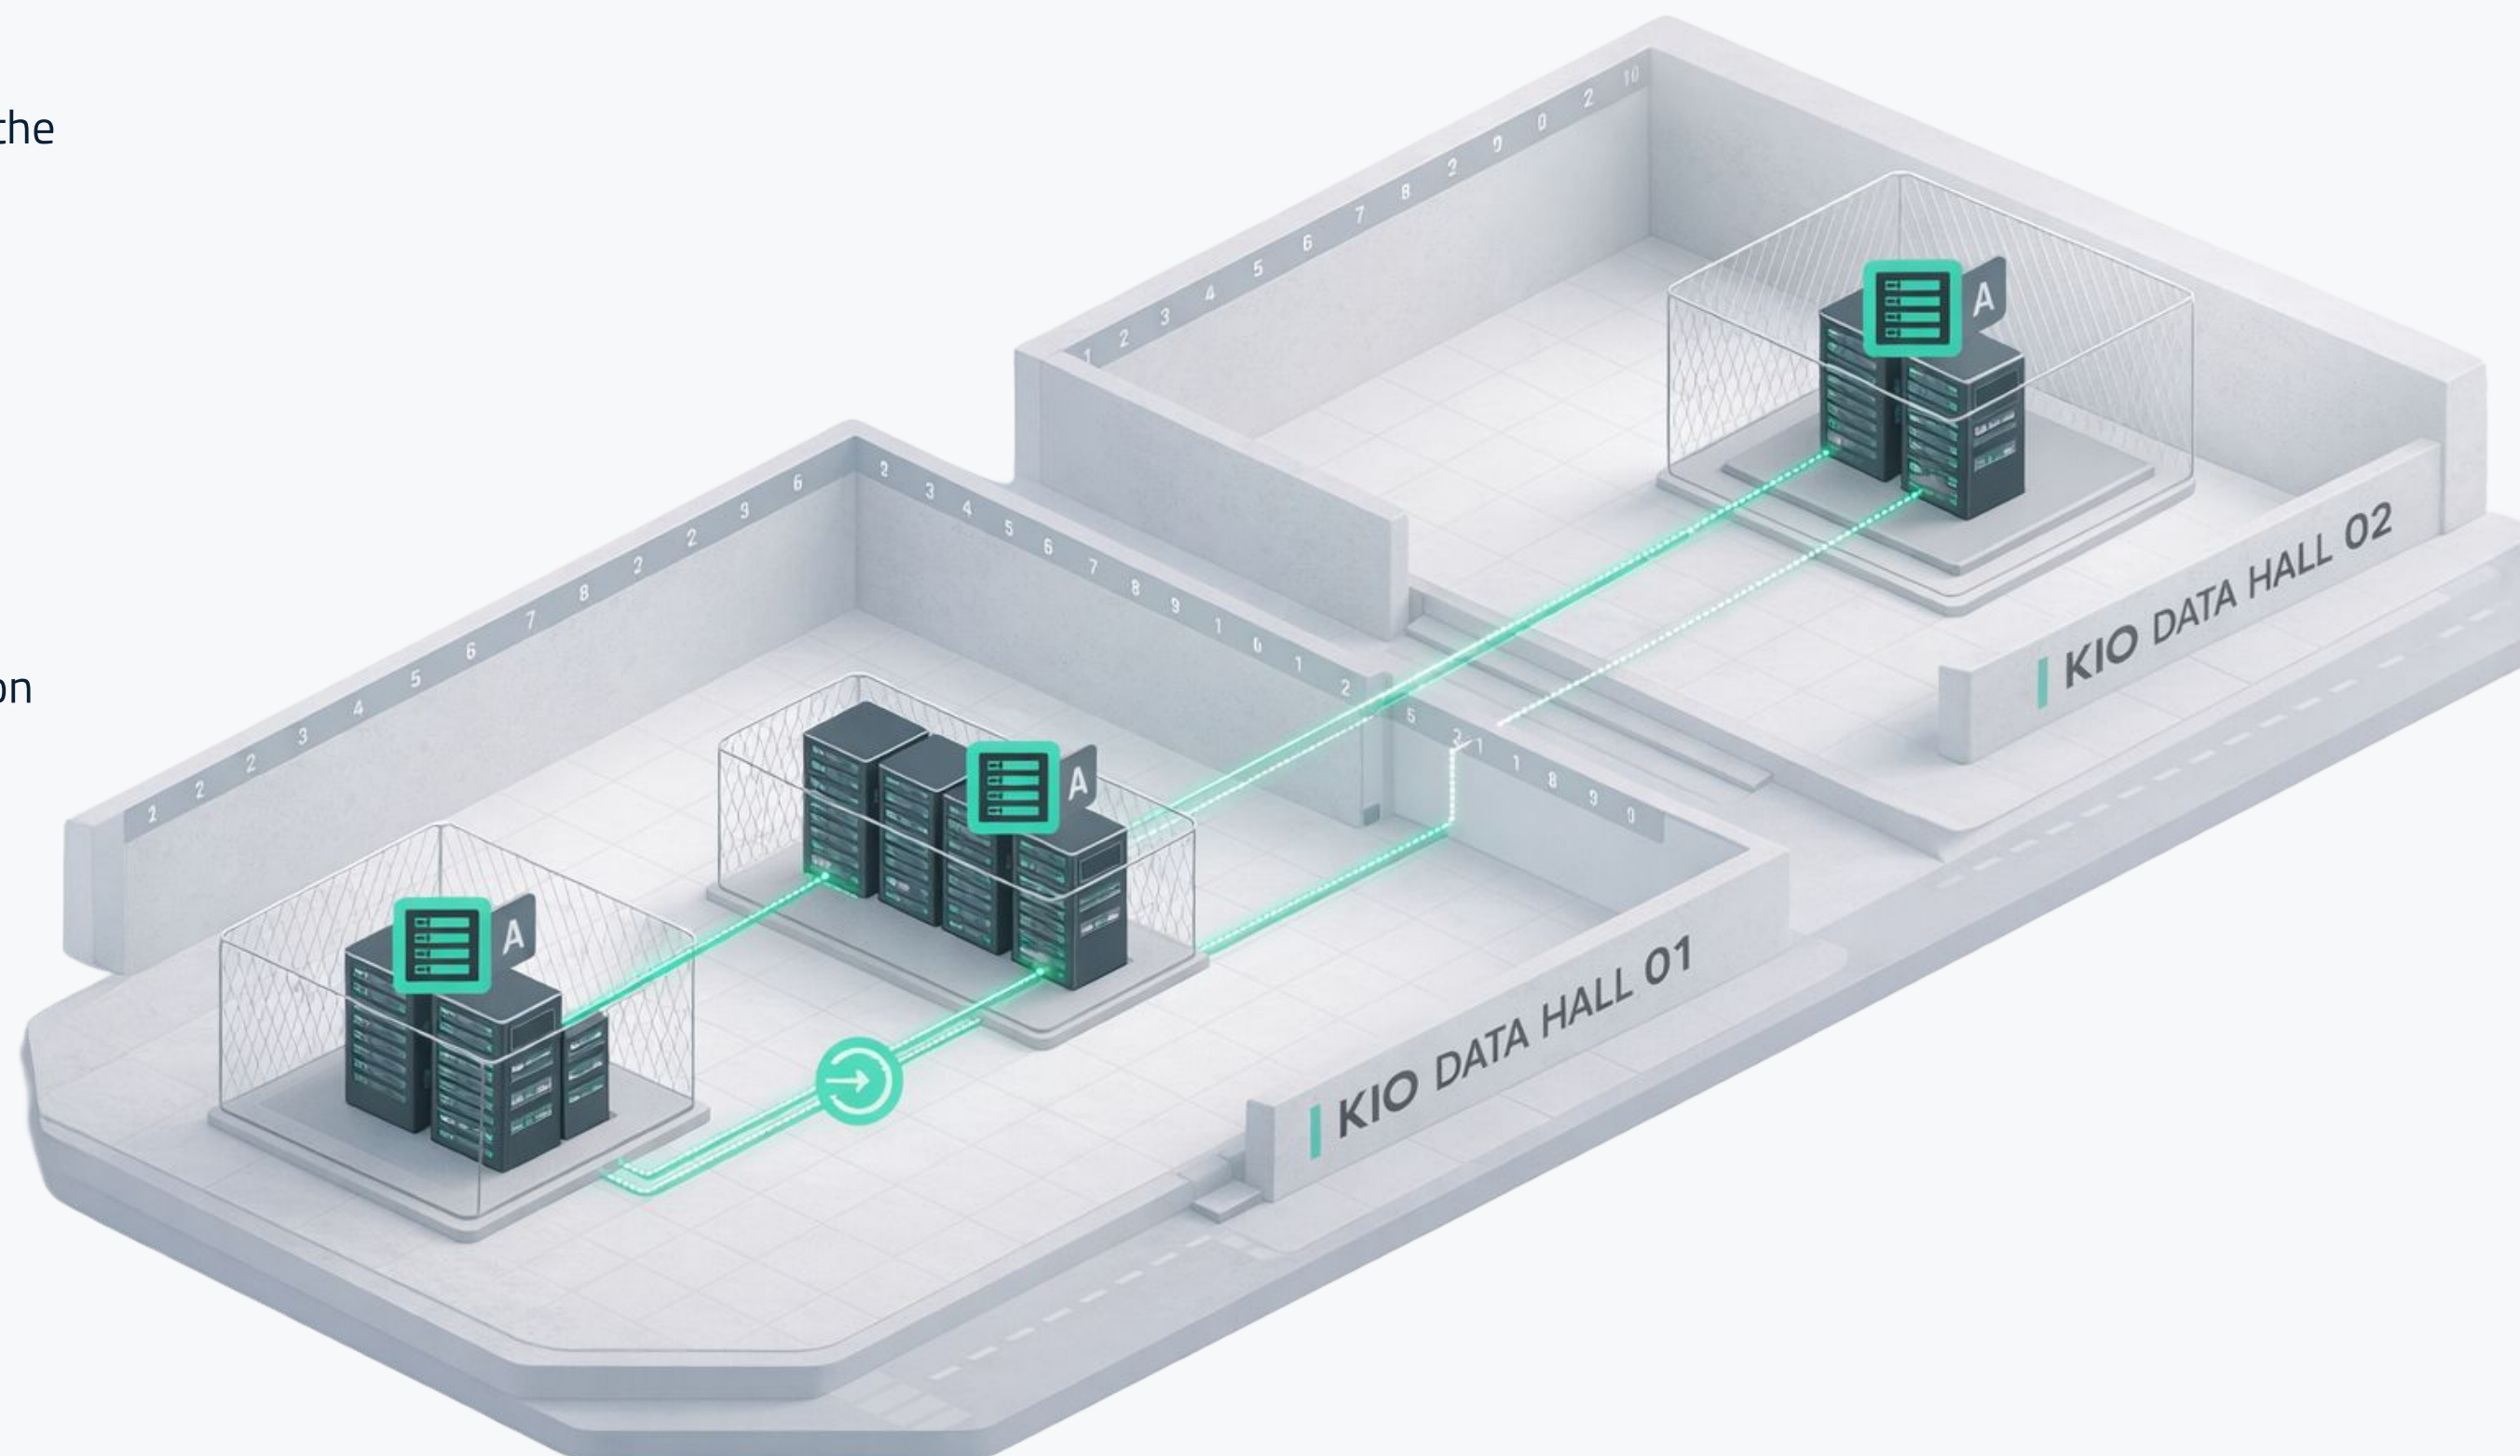

- Connection between racks or IT cages of the same customer.
- 100% dedicated connectivity.

### Commercial

- Non-Recurring Charge (NRC): installation one-time charge.
- Monthly Recurring Charge (MRC): not applicable for IC cabling.
- Minimum contract term of 3 months.

### Implementation

- An standard service request: 1-10 Intra Connects products.
- Implementation SLA: 72 hrs.
- Special Projects: A feasibility and delivery time evaluation for special high volume projects or with custom requirements.

### Additional Considerations

- Additional components like ODFs, Patch Panels, Patch Cords or Jumpers, are not included.

### Technical Specifications

#### Type of material

- Copper wiring Unshielded Twisted Pair (UTP), RJ45 connector, 90 mts maximum.
